

#30DaysOfCode / Mobile Track

Day 2

Track 1:

Isogram:

Determine if a word or phrase is an isogram.

An isogram (also known as a "nonpattern word") is a word or phrase without a repeating letter, however spaces and hyphens are allowed to appear multiple times.

Examples of isograms:

lumberjacks
background
downstream
six-year-old

The word isograms, however, is not an isogram, because the s repeats.

Track 2:

Tribute App:

visit [dribbble](#), [uplabs](#) for UI inspiration
